Please select the VGM evaluation method. (please mark with "X")

	Method 1: (by weighing) After a shipment has been completely packed, the shipment can be weighed by regular equipment (scales, fork lift scales, crane scales, etc.). The weighting equipment must meet national certification and calibration requirements.
	Method 2: (by calculation) All packages and cargo items may be weighted individually, including mass of dunnage, pallets, packing and securing material and added to the Tare weight of the container.

The Shipper of record, or the duly authorized representative of the Shipper, hereby certifies, that the weight of each container referenced above is the accurate Verified Gross Mass (VGM) of those containers, in accordance with the requirements of the International Convention for the Safety of Life at Sea (SOLAS); as they have been published in Chapter VI, Part A, Regulation 2 - Cargo Information. Amendments, updates and/or corrections to the verified weights must be communicated and submitted to Hyde Shipping Corp immediately and without any delay.

The undersigned certifies that he/she has the proper delegated authority and power to execute this VGM certification.
